Jaydon Moses

978-594-7083 | moses.ja@northeastern.edu | linkedin.com/in/jaydonmoses | github.com/jaydonmoses | Boston, MA

Education

Northeastern University May 2028
Bachelor of Science in Computer Science *Boston, MA*
Relevant Coursework: Data Structures & Algorithms, Object Oriented Design, Foundations of Data Science

Skills and Technologies

Languages: Python, Java, TypeScript, SQL, JavaScript, C#.
Machine Learning & Data: Pandas, NumPy, scikit-learn, OpenCV, Matplotlib, Plotly, BeautifulSoup4.
CS Fundamentals: Algorithms, RESTFul API, Software Design Patterns.
Developer Tools: Git, JetBrains, VS Code, SQLiteStudio.

Experience

Knack Tutor Jan 2026 – Present
Knack Tutoring *Boston, MA*
- Tutoring 5+ students weekly in Discrete Structures and Foundations of Data Science, maintaining a positive rating
- Simplified complex mathematical concepts, including combinatorics, probability, and statistical inference, through simple and digestible examples and visual aids, helping students improve assignment scores and exam performance.
- Collaborated with tutors to share teaching strategies, ensuring consistent, high-quality support across the platform.

Machine Learning Developer Oct 2025 – Present
Northeastern AI Club *Boston, MA*
- Implementing Python-based data cleaning and pipelines, reducing dataset preparation time by 20%.
- Assisting in training, tuning, and evaluating baseline machine learning models by performing feature selection, hyperparameter adjustment, and model comparison, resulting in 10% improvement in baseline accuracy.
- Creating Jupyter notebooks to document experiments and results, enabling work across a 5+ member team.

Projects

Khoury Research Matcher | *Python, FastAPI, React, SQLite, Beautiful Soup* Sep 2025 – Present
- Developing a full-stack web application that facilitates connections between undergraduate students and over 858 Khoury College professors, leveraging intelligent research-interest matching algorithms to ensure relevant pairings.
- Designing a relational SQLite database storing faculty research areas, academic profiles, and contact information.
- Implementing automated web scraping using Beautiful Soup to extract and normalize data from over 56 professor pages, streamlining the process of data collection and ensuring data consistency for the application's functionality.

FIJI E-commerce Store | *React, TypeScript, Node.js, PostgreSQL, Prisma* Jan 2026 – Present
- Developing a full-stack e-commerce platform, including both a customer-facing storefront and a comprehensive admin dashboard. The project utilizes Next.js and TypeScript for full-stack development and code maintainability.
- Implemented shopping cart functionality, product search, order management, and secure authentication workflows.
- Developed a robust PostgreSQL database using Prisma ORM for efficient data management and deployed the application on Vercel, incorporating automated CI/CD pipelines for reliable updates, ensuring application stability.

Real-Time Chat Application | *Java, Spring Boot, WebSockets, STOMP* Jan 2026
- Developed and implemented a robust real-time messaging system using Spring Boot and WebSockets, specifically engineered to facilitate low-latency communication and seamless interactions among a high volume of users.
- Implemented a STOMP-based pub/sub architecture with clear separation of concerns, dividing the codebase into WebSocket configuration, controllers, services, and data layers to improve maintainability and scalability.

Activities

- **Residential Assistant**, *Northeastern University Housing* | Feb 2026 - Present
- **Brother**, *Phi Gamma Delta* | Oct 2025 - Present
- **Member**, *NUAI Club* | Oct 2025 - Present

Interests: Fitness | Basketball | Chess | Weightlifting | Painting | Phi Gamma Delta
